## TEACHING VERBAL BEHAVIOR TO CHILDREN WITH AUTISM AND OTHER DISABILITIES

April, 10-11-12 2013 - From 09.30 to 17.30

### Workshop Description

Participants in this workshop will learn:

- to conduct a Behavioral Language Assessment,
- to select the most appropriate form of communication for a child (vocal, signing, pointing to or exchanging pictures, or activating an augmentative device)
- to select the communication responses and supporting skills that should be taught first.

The workshop includes the recommended teaching procedures for those children who have no formal communication skills to those that are near conversational speakers. The presenter also describes and demonstrates errorless teaching, specific quick-transfer (prompting and fading) procedures, and the use of both discrete trial training in the natural environment and during intensive teaching session. Many video tape demonstrations are provided to illustrate the methods to increase spontaneous language and to develop conversational skills.

### Workshop Program

#### Day 1

- B. F. Skinner's Analysis of Verbal Behavior
- Mand Training
- NET and Teaching Learner Cooperation
- Data Based Decision-Making and Performance Management

#### Day 2

- Teaching Language
- Assessment
- Alternative Communication Methods

#### Day 3

- Teaching Non Vocal Learners
- Advanced Verbal Behavior Skills
- Miscellaneous Topics

### Materials

All attendees will receive a detailed workbook covering all aspects of the workshop including extensive references.
